

Homework 1

January 5, 2024

This is the first homework assignment for AMATH 301 Winter 2024. The purpose of this assignment is to make sure you are comfortable using Gradescope. Here are a few questions asking you to introduce yourself. You should upload a scanned PDF to Gradescope and then follow the prompts given by Gradescope to assign certain pages of your PDF document to the correct problems.

The course syllabus found on Canvas has information on how homework is graded and how homework should be presented and submitted. Please let me or the TAs know if you have any questions or concerns.

This assignment is due on Thursday, January 11 at 11:59pm.

1. List your name and your major(s) and minor(s). Also, tell me one thing you like to do in your free time (this is optional).
2. List up to three of the most recent math or applied math courses you have taken. Please list the title of the course rather than the course number. For example, the title of this course is Beginning Scientific Computing and the course number is AMATH 301.
3. The purpose of this problem is to make sure you are comfortable uploading and assigning more than one page of your PDF to one homework problem. Please write “Problem 3 part 1” on one page and “Problem 3 part 2” on the separate page of your PDF document. Please assign both of these pages to problem 3 when you are prompted to by Gradescope.
4. On the syllabus, there is a schedule for this course. On what day of the week are homework assignments assigned? On what day of the week are the homework assignments due?
5. On our Canvas webpage, there is a module titled “Office Hours.” When do office hours take place on Mondays?
